

Subject: Immunization

Dear parents,

You have just registered your child for preschool for the upcoming school year. In accordance with Québec's vaccination schedule, a vaccination between the ages of 4 and 6 is recommended. According to the Québec Immunization Protocol, your child will receive the following vaccine: dcat-vpi (diphtheria, pertussis, tetanus, and poliomyelitis).

The start of the school year is a great time to make sure your child has received and will receive all recommended immunizations. Family doctors and CLSC immunization nurses are available to assess vaccination history (vaccination booklet and Quebec vaccination registry) and can proceed with immunization as needed.

Please contact any of the following CLSC locations of the CISSS de l'Outaouais to make an appointment at: <https://portal3clicsante.ca>

Thank you for your collaboration.

The school nurses.
